

Your first step to clean air

A cost-efficient, well-maintained and healthy property

Health and Productivity of Occupants

Prevent health issues and occupant complaints by ensuring that the environment is always comfortable, safe and optimized for higher alertness and productivity.

Sustainability Certifications

Attain building standards and certifications through a proper feedback and management system to enhance the branding, desirability and capital value of your property.

New Revenue Stream

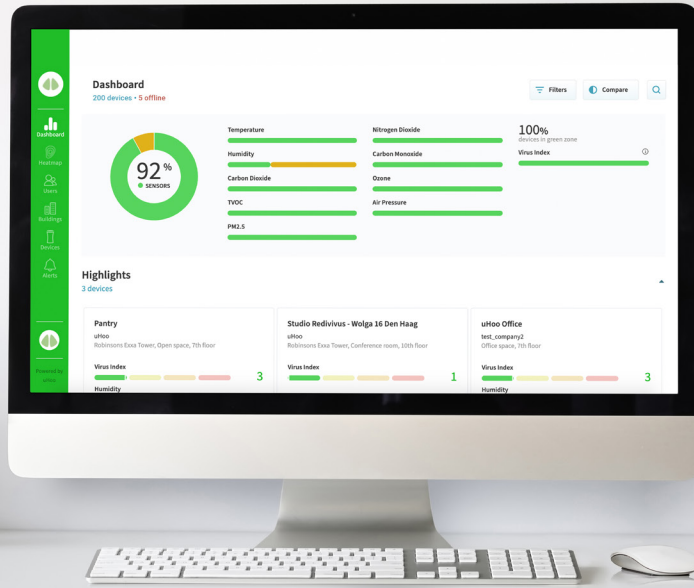

Provide additional services to your tenants/clients that contributes to an overall increase in their health, well-being and performance

Energy Savings and Building Maintenance

Prevent risks, accidents and hazards, such as chemical leaks and equipment malfunction by identifying changes in the building's environment in real time.

Monitor 13 Parameters

Best in class indoor environmental quality monitor

Temperature

Relative Humidity

Carbon Dioxide

Carbon Monoxide

Dust PM₁

Dust PM_{2.5}

Dust PM₄

Dust PM₁₀

VOCs

Formaldehyde

Air Pressure

Virus Index

Light

Noise

**Expandable by two more sensors (up to 15 in total) of your choice.*
